

Selected publications of Mireille Lavagna

Emission noise in an interacting quantum dot: role of inelastic scattering and asymmetric coupling to the reservoirs

A. Crépieux, S. Sahoo, T.Q. Duong, R. Zamoum, and M. Lavagna
Phys. Rev. Lett. **120**, 107702-107707 (2018)

DOI: 10.1103/PhysRevLett.120.107702

Charge susceptibility and conductances of a double quantum dot

V. Talbo, M. Lavagna, T. Duong, and A. Crépieux

AIP Advances **8**, 101333 (2018)

DOI: 10.1063/1.5043108

Non-symmetrized quantum noise in a Kondo quantum dot

A. Crépieux, S. Sahoo, T.Q. Duong, R. Zamoum, and M. Lavagna

AIP Advances **8**, 101326 (2018)

DOI: 10.1063/1.5043076

Out-of-equilibrium Kondo effect in a quantum dot: Interplay of magnetic field and spin accumulation

S. Sahoo, A. Crépieux, and M. Lavagna

Europhysics Letters **116**, 57005 (2016)

DOI: 10.1209/0295-5075/116/57005

Non-symmetrized noise in a quantum dot: interpretation in terms of photon emission and coherent superposition of scattering paths

R. Zamoum, M. Lavagna, and A. Crépieux

Phys. Rev. B **93**, 235449 (2016)

DOI: 10.1103/PhysRevB.93.235449

Finite-frequency noise in a non-interacting quantum dot

R. Zamoum, M. Lavagna, and A. Crépieux

J. Stat. Mech.: Theory and Experiment 054013 (2016)

DOI: 10.1088/1742-5468/2016/05/054013

Jacques Friedel and the physics of metals and alloys

J. Villain, M. Lavagna, and P. Bruno

C.R. Physique **17**, 276-290 (2016)

DOI: 10.1016/j.crhy.2015.12.010

Transport through an interacting quantum dot driven out-of-equilibrium

M. Lavagna

Journal of Physics **592**, 012141 (2015)

DOI: 10.1088/1742-6596/592/1/012141

Anderson model out of equilibrium: decoherence effects in transport through a quantum dot

R. Van Roermund, S.-y. Shiao, and M. Lavagna

Phys. Rev. B **81**, 165115-165134 (2010)

DOI: 10.1103/PhysRevB.81.165115

New trends for the Kondo effect in nanostructures

S. Andergassen, D. Feinberg, S. Florens, M. Lavagna, S.-y. Shiao, P. Simon, and R. Van Roermund

Int. J. Nanotechnol. **7**, 438-455 (2010)

DOI: 10.1504/IJNT.2010.031729

Phase shift of Electrons Across a Quantum Dot

M. Lavagna

Nano Newsletter **9**, 25-27 (2007)

Intermediate coupling fixed point study in the overscreened regime of generalized multichannel $SU(N)$ models Kondo

D. Bensimon, A. Jerez, and M. Lavagna

Phys. Rev. B **73**, 224445-224464 (2006)

DOI: 10.1103/PhysRevB.73.224445

Theoretical analysis of the Transmission Phase Shift of a Quantum Dot in the Presence of Kondo Correlations

A. Jerez, P. Vitushinsky, and M. Lavagna

Phys. Rev. Lett. **95**, 127203 (2005)

DOI: 10.1103/PhysRevLett.95.127203

Antiferromagnetism of almost localized fermions: Evolution from Slater-type to Mott-Hubbard gap

P. Korbel, W. Wojcik, A. Klejnberg, J. Spalek, M. Acquarone, and M. Lavagna

Eur. Phys. J. B **32**, 315-322 (2003)

DOI: 10.1140/epjb/e2003-00104-9

Strong-coupling fixed point instability in a single-channel $SU(N)$ Kondo model

A. Jerez, M. Lavagna, and D. Bensimon

Phys. Rev. B **68**, 094410-094437 (2003)

DOI: 10.1103/PhysRevB.68.094410

Instability of the Fermi-liquid fixed point in an extended Kondo model

M. Lavagna, A. Jerez, and D. Bensimon

Concepts in Electron Correlation, Kluwer Academic Press **110**, 219-227 (2003)

DOI: 10.1007/978-94-010-0213-4

Quantum Phase Transitions

M. Lavagna

Phil. Mag. B **81**, 1468-1483 (2001)

DOI: 10.1080/13642810108208565

Critical phenomena near the antiferromagnetic quantum critical point of Heavy-Fermions

M. Lavagna, and C. Pépin

Phys. Rev. B **62**, 6450-6457 (2000)

DOI: 1103/PhysRevB.62.6450

Supersymmetry and theory of heavy fermions

C. Pépin, and M. Lavagna
Phys. Rev. B **59**, 12180-12183 (1999)
DOI: 10.1103/PhysRevB.59.12180

Dynamic spin-correlation function near the antiferromagnetic quantum phase transition of heavy fermions

C. Pépin, and M. Lavagna
Phys. Rev. B **59**, 2591-2598 (1999)
DOI: 10.1103/PhysRevB.59.2591

Spin dynamics near the Quantum Critical Point of heavy fermions

C. Pépin, and M. Lavagna
Physica B: Condensed Matter **259-261**, 370-371 (1999)
DOI : 10.1016/S0921-4526(98)008

The Kondo Lattice Model

M. Lavagna, and C. Pépin
Acta Physica Polonica B **29**, 3753-3779 (1998)

Supersymmetric approach to heavy fermion systems

C. Pépin, and M. Lavagna
Z. Phys. B **103**, 259-261 (1997)
DOI: 10.1007/s002570050

Theory of spin dynamics in high- T_C superconductors

M. Lavagna, G. Stemmman, and C. Pépin
Physica B: Condensed Matter **215**, 62-70 (1995)
DOI: 10.1016/0921-4526(95)00026-6

Spin fluctuations beyond the Gutzwiller approximation : a renormalized paramagnon theory

R. Raimondi, and M. Lavagna
J. Low Temp. Phys. **99**, 355-357 (1995)
DOI: 10.1007/BF00752308

Spin Dynamics in high- T_C copper oxides

M. Lavagna, G. Stemmman et C. Pépin
J. Low Temp. Phys. **99**, 337-342 (1995)
DOI: 10.1007/BF00752305

Spin-gap and magnetic excitations in the cuprate superconductors

G. Stemmman, M. Lavagna, and C. Pépin
Physica C: Superconductivity **235**, 1681-1682 (1994)
DOI: 10.1016/0921-4534(94)92062-1

Spin-gap and magnetic excitations in the cuprate superconductors

G. Stemmman, C. Pépin, and M. Lavagna
Phys. Rev. B **50**, 4075-4085 (1994)
DOI: 10.1103/PhysRevB.50.4075

Spin excitations in high-Tc superconductors : discussion of neutron and NMR experiments

M. Lavagna, G. Stemann, and C. Pépin

Physica B: Condensed Matter **194-196**, 1443-1444 (1994)

DOI: 10.1016/0921-4526(94)91221-1

Spin-Excitations of two-dimensional lattice electrons: discussion of neutron diffraction and NMR experiments in high-Tc superconductors

M. Lavagna, and G. Stemann

Phys. Rev. B **49**, 4235-4250 (1994)

DOI: 10.1103/PhysRevB.49.4235

Magnetic excitations in the t-J model: application to neutron and NMR experiments in high-Tc materials

D.R. Grempel, and M. Lavagna

Solid State Comm. **83**, 595-599 (1992)

DOI: 10.1016/0038-1098(92)90658-V

Charge and spin fluctuations in the Hubbard model: Fermi liquid properties at low temperature

M. Lavagna

Int. Journ. of Mod. Phys. B **5**, 885 (1991)

DOI : 10.1142/S021797929100047X

Functional integral approach to strongly correlated Fermi systems: quantum fluctuations beyond the Gutzwiller approximation

M. Lavagna

Phys. Rev. B **41**, 142-148 (1990)

DOI: 10.1103/PhysRevB.41.142

Slave-boson approaches to strongly correlated systems

M. LAVAGNA

Helv. Phys. Act. **63**, 310-322 (1990)

DOI: 10.5169/seals.116222

High-T_C superconductors as almost-localized systems: resonance and fluctuations

M. Lavagna

Physica C: Superconductivity **153-155**, 1271-1272 (1988)

DOI: 10.1016/0921-4534(88)90276-6

Superconductivity and Mott localization

M. Lavagna

Ann. Phys. **13**, 441-446 (1988)

DOI: 10.1051/anphys :01988001305044100

Quantum fluctuations on the Gutzwiller approximation of the Hubbard model

M. Lavagna

Int. Journ. of Mod. Phys. B **2**, 607-612 (1988)

DOI: 10.1142/S0217979288000421

High- T_c superconductors as almost-localized systems: resonance and fluctuations

M. Lavagna

J. Phys. Colloques **49** C8-2227 - C8-2228 (1988)

DOI: 10.1051/jphyscol:19888997

d-wave superconductivity in the large degeneracy limit of the Anderson lattice

M. Lavagna, A.J. Millis, and P.A. Lee

Phys. Rev. Lett. **58**, 266-269 (1987)

DOI: 10.1103/PhysRevLett.58.266

Plasma oscillations in heavy-fermion materials

A. J. Millis, M. Lavagna, and P. A. Lee

Phys. Rev. B **36**, 864-867 (1987)

DOI: 10.1103/PhysRevB.36.864

Slave-boson large degeneracy expansion for the lattice Anderson model

A. J. Millis, M. Lavagna, and P. A. Lee

Journ. of Appl. Phys. **61**, 3904-3908 (1987)

DOI : 10.1063/1.338578

d-wave superconductivity in the Anderson lattice

M. Lavagna, A.J. Millis, and P.A. Lee

J. Magn. Magn. Mat. **63-64**, 432-434 (1987)

DOI: 10.1016/0304-8853(87)90629-9

Coherence effects in the two-impurity Kondo problem

M. Lavagna

J. Magn. Magn. Mat. 47-48, 360-363 (1985)

DOI: 10.1016/0304-8853(85)90439-1

Coherence effects in the two-impurity Anderson problem

M. Lavagna, and M. Cyrot

Solid State Com. **55**, 555-558 (1985)

DOI: 10.1016/0038-1098(85)90334-5

The γ - α transition in cerium compounds

M. Lavagna, C. Lacroix, and M. Cyrot

J. Phys. F: Met. Phys. **13**, 1007-1015 (1983)

DOI: 10.1088/0305-4608/13/5/014

Volume collapse in the Kondo lattice

M. Lavagna, C. Lacroix, and M. Cyrot

Physics Letters A **90**, 210-212 (1982)

DOI: 10.1016/0375-9601(82)90689-2

Resistivity of the Kondo lattice

M. Lavagna, C. Lacroix, and M. Cyrot

J. Phys. F: Met. Phys. **12**, 745-757 (1982)

DOI: 10.1088/0305-4608/12/4/015

Thermopower of the Kondo lattice

M. Lavagna, C. Lacroix, and M. Cyrot
Physics Letters A **89**, 154-156 (1982)
DOI: 10.1016/0375-9601(82)90880-5

Electrical resistivity of the Kondo lattice

M. Lavagna, C. Lacroix, and M. Cyrot
Journ. of Appl. Phys. **53**, 2055-2057 (1982)
DOI : 10.1063/1.330742

Effects of order on the electronic structure of ferromagnetic transition metal alloys

M.C. Desjonquères, and M. Lavagna
J. Phys. F: Met. Phys. **9**, 1733-1743 (1979)
DOI: 10.1088/0305-4608/9/9/005

Itinerant metamagnetism in rare earth-transition metal compounds

M. Cyrot and M. Lavagna
Journ. of Appl. Phys. **50**, 2333-2335 (1979)
DOI: 10.1063/1.326992

Magnetism of the rare earth, 3d - Theoretical review

M. Cyrot, D. Gignoux, F. Givord, and M. Lavagna
J. Phys. Colloques **40**, C5-171-C5-176 (1979)
DOI: 10.1051/jphyscol:1979563

Density of states and magnetic properties of the rare-earth compounds RFe_2 , RCo_2 , RNi_2

M. Cyrot, and M. Lavagna
J. Phys. France **40**, 763-771 (1979)
DOI: 10.1051/jphys:01979004008076300

Theoretical analysis of the quantum photoelectric yield in Schottky diodes

M. Lavagna, J.P. Pique, and Y. Marfaing
Solid-State Electronics **20**, 235-240 (1977)
DOI: 10.1016/0038-1101(77)90190-3
